

# HEALTH & SAFETY POLICY

November 2021

The Company believes the control of all health and safety aspects arising from our work is an essential feature of an efficient operation. Management recognises and accepts the responsibility to provide and maintain safe working conditions and a healthy environment for all persons who may be affected.

In pursuance of the above it is company policy to have a competent person assess risks arising from the Company's day to day operations and to:

- Provide equipment and systems of work that are safe and free from risks to health.
- Make arrangements to ensure safety and absence of risk to health.
- Provide such information, instruction, training and supervision as is necessary to ensure the health and safety at work of all employees.
- Provide a working environment that is safe and free from risks to health with adequate facilities and arrangements for the welfare of employees at work.
- Safeguard visitors to all areas within the management's control and any members of the public who may be affected by our activities.
- Ensure that all information concerning the safe operation pertaining to our services is provided.

Successful implementation of policy is dependent on the co-operation of all members of staff and in view of this, ignoring safety rules could be a disciplinary matter.

All members of staff should notify their Safety Officer or Factory Manager immediately of any potential safety hazard.
